

FANCHEDE MELVYN

CYBERSECURITY APPRENTICESHIP – SYSTEMS & NETWORK ADMINISTRATOR

Cybersecurity student with a passion for IT, I have gradually shifted from offensive security toward networking and systems administration.

My first internship strengthened my technical knowledge and gave me insight into how a professional environment works.

Serious, curious and motivated, I am looking for an opportunity to deepen my skills and contribute to the projects of an IT team.

FORMATION

BACHELOR'S IN SOFTWARE DEVELOPMENT, CYBER TRACK (RNCP LEVEL 6 QUALIFICATION)

Guardia Cybersecurity School - Puteaux 92800

2025 – 2028

TECHNOLOGICAL BACCALAUREATE STI2D, DIGITAL SYSTEMS & INFORMATION TECHNOLOGIE OPTION (SIN)

Lycée Jules Ferry – Versailles 78000

2022 - 2025

PROFESSIONAL EXPERIENCE

SYSTEME & NETWORK ADMINISTRATOR INTERNSHIP

Les Résidences Yvelines Essonne – Mantes La Jolie 78200

May 2026 – July 2026

- IT asset management and support: assisted with the renewal of the computer fleet by securing the new workstations and handling daily incidents, ensuring a smooth transition for users.
- Audited the files servers by analysing internal access rights and identifying potential vulnerabilities.
- Mapped the internal network, making the infrastructure easier to understand and helping detect weak points.
- Analysed the Microsoft security solutions in place, documenting configurations and protection mechanisms for the team.

LABORATORY TECHNICIAN INTERNSHIP

GINGER CEBTP – Elancourt 78990

February 2022 – 1 week

- Designed and tested technical solutions using laboratory tools, meeting specific project needs.
- Ran tests on laboratory samples, contributing to the validation of project results.
- Used chemistry laboratory equipment for experiments, following safety and handling protocols.

PROJECTS

Network Security Techniques (Systems, Networks & Security)

Built an infrastructure on GNS3

- Installed and configured a pfSense router and a Layer 3 switch
- Inter-VLAN routings et ACLs
- DHCP and DNS configuration

Metasploitable

Penetration test on Windows 7 VM

- Used Nmap for OS fingerprinting and banner grabbing
- Exploited the vulnerability and escalated privileges
- Upgraded the shell to Meterpreter

Trojan Creation

Executable hidden inside an image, on a Windows 7 VM

- Used msfvenom to generate shellcode
- Built the booby-trapped image with WinRAR
- Learned how SFX archives and payloads (bind and reverse) work

Active directory

Creation of an AD forest

- Configured the VMware network in Host-Only mode for the lab
- Promoted a Windows Server to AD DS and deployed a domain controller on GNS3
- Configured DHCP, DNS and a NAT router
- Created Ous and sub-OUs
- Set up a bastion host
